

## SmarteSolutions

### The Smarte Choice for Test Success

#### Comprehensive Test Solutions

Assure test project success with SmarteSoft's comprehensive automated testing solutions, customized according to your specific business needs and ranging from complete turnkey solutions to staff augmentation and everything in between.

Whether your critical mission is Functional Test, Performance Test or Quality Assurance, SmarteSoft offers a complete solution that reduces cost,

*SmarteSoft's suite of test tools means you'll get the right tool for the job.*

reduces risk and boosts business profit.

Solution Software Tools include integrated automation and performance software as well as productivity tools. Extend test capabilities to additional workstations and execute test unattended, around the clock.

With SmarteSoft Solutions, your organization will more

easily manage the test life cycle process, enhance

schedule predictability and improve the quality and performance of delivered products.

Varying from small, independently owned firms to global powerhouses, our customers depend on SmarteSoft Test Solutions. Our customers include Fortune 1,000 companies in the technology, health-care/medical, government, energy, retail and finance/banking/insurance industries. We are dedicated to providing superior customer service. Our customers think we're the best in the industry. Join the community that depends on SmarteSoft!

#### Solution Services

SmarteSoft provides a scalable variety of solution services to help your company achieve their goals. Solution Service options include test plan, test architecture, project scoping, test automation implementation, support, training and consulting.

Whether you need automation experts to handle your entire functional testing project, or just need assistance to get the project started, SmarteSoft can help.

**Foundation Services:** Successful projects start with a solid foundation including a well defined Test Plan and flexible Test Architecture. The most common mistake testers make? Jumping in feet first without suitable project planning and design. Foundation Services provide a team of one or more software test automation experts to define a suitable Software Test Plan, design Test Architecture and an Implementation Plan.

Your employees work side-by-side with our test experts to become proficient at enhancing and maintaining the test suite, with complete transition to your team being achieved as rapidly as possible.

**Complete Turnkey:** We handle the entire software test project for you – from planning to test architecture, scoping, test case design, implementation, execution, reporting and maintenance.

#### SOLUTION SOFTWARE TOOLS

Control test management and boost test productivity with these powerful tools.

##### SmarteQM™

Manage project requirements, releases, test cases, issues and tasks in one environment. Take control of project life cycle and synchronize the sometimes separate worlds of development and testing.

##### SmarteScript™

Powerful, robust, proven automated functional test tool. SmarteScript is easy to learn with no scripting skilled needed – even for complex functions. Ramp-up quickly, making acceptance and deployment easy as well.

##### SmarteTime™

The SmarteScript scheduling tool provides precise scheduling of when to run test scripts and on which workstations. It is network and storage aware. Set tests to run overnight or to avoid planned maintenance.

##### SmarteX™

The run-time version of SmarteScript. SmarteX provides the flexibility of running tests created with SmarteScript on secondary systems, boosting testing productivity.

##### SmarteLoad™

Verify your system's ability to cope with load and stress under any scenario. Simulate usage patterns and ramp load up, analyzing bottlenecks and optimizing performance.

#### THE DETAILS

##### SUPPORTED ENVIRONMENTS, PLATFORMS AND APPLICATIONS

- Web, Desktop, Mobile, Point-of-Sale and Mainframe environments
- Internet Explorer, Chrome, Firefox
- All Microsoft .NET compilers, Microsoft Visual C++, Intel C++, Microsoft Visual Basic, Java, AJAX, VB6, Console

Choose SmarteSoft Total Test Solutions for Automated Testing, Regression Testing, Load and Performance Testing.

**SMARTESOFT, founded in 1999, is a privately held company headquartered in Austin, Texas, with design, research and development and support around the world.**

#### TOTAL TEST SOLUTION

Contact [info@smartesoft.com](mailto:info@smartesoft.com) or (512) 782-9409. We'll find the best test solution to meet your unique needs.

## Solution Training Services

Training increases return on investment by helping your team quickly become experts in the tools they use everyday. Deployment is easy. Start effective testing today!

### On-Site Training

Custom, on-site software training programs are available. Take your team from little or no testing experience to expert testers in a matter of days.

### Self-Paced Training

Take advantage of our web-based or computer-based training programs for a more flexible training schedule.

### Webinars

Training webinars, both live and recorded, are accessible at any time and offer the most flexible training option of all.

### Technical Support

Deeply experienced, friendly technical support professionals are available to assist you. Our experienced performance and automation engineers listen carefully and respond with clear, concise information.

### SmarteSoft Forum

Visit the SmarteSoft Forum to share information with other test professionals.

## TOTAL TEST SOLUTION

Contact [info@smartesoft.com](mailto:info@smartesoft.com) or (512) 782-9409. We'll find the best test solution to meet your unique needs.

**Consulting:** Sometimes a little advice goes a long way. Your team may be able to make better decisions with just a little guidance from a seasoned automation or performance test professional. Or a new perspective from a third-party review can get you back on track. Whatever your needs, we have seasoned professionals ready to help optimize your results.

**Load/Performance Test:** For companies that don't need (or want) to invest in the infrastructure and/or expertise needed for load and performance testing, SmarteSoft provides the people, equipment, lab space and licenses to get the job done. Whether performance and load test only happens once a year, multiple times, or continuously, SmarteSoft makes it easy for you.

## The Right Tools for the Job

Easy-to-learn tools (with no manual scripting ever needed) and sharing test life cycle management and test cases among development and deployment teams, our software tools bridge the gap between Development, Quality Assurance, Business Analysis and Deployment. Our test experts will help you determine the appropriate tools needed to achieve your goals.

## Value Built In

### Faster, Vastly Expanded Test Coverage:

Do the same automated software testing in less time or greatly increase test coverage. Or both. The choice is yours.

**Never Worry About Software Quality:** Greater test coverage and more frequent testing; catch defects and fix problems before software ships.

**Flexible Staffing:** Train manual testers to become expert users of Smarte Tools quickly. With no scripting skills required and an AI engine doing the heavy lifting, all of the QA team can execute test automation. The Benefits? Fluid assignments, more flexible staffing plans. Up-skill everyone. Motivate everyone. Adapt to circumstances more easily.

## SUCCESS STORIES

### TEST FASTER

"We experienced an 80% improvement in test automation implementation time once we switched to SmarteScript."

– QA Director, major airline

### EASE OF USE

"SmarteScript is an intuitive, user-friendly package that is easy to use and maintain. The software is great and we have also had great response from SmarteSoft support."

– Director of QA  
major payroll and benefits processing firm

### RELIABILITY

"SmarteScript easily integrated into our test environment and enabled us to remove many of the manual steps that were the most error prone and time consuming."

– QA Manager, financial institution

### RE-USABILITY

"We choose SmarteScript to automate script generation and re-use code as our application changes and grows. SmarteScript allows our team to create re-usable code automatically and reliably."

– VP Technology, test lab

### VERIFY PERFORMANCE

"SmarteLoad, with its flexible licensing, allowed us to implement performance testing at multiple sites around the world without having to spend a fortune on licenses. The re-use of scripts inherited from SmarteScript saved us a great deal of time. And we were able to very rapidly drill down into the root causes of performance issues with SmarteLoad's powerful test data analysis tools."

– CTO, database mining tools firm
