The Benefits of *Going Smarte™*

- Increased test execution
- Increased test coverage
- Lower testing costs
- Quickly adapt to changes
- Easy script maintenance
- Test business processes
- Auto-generate Reports and Documentation
- High ROI
- Lower cost of ownership

SmarteSoft™ Professional Services

- Assessment Services
- Design Services
- Implementation Services
- Test Automation Services
- Product Training

SmarteX™ Extends Functional & Regression Testing to Additional Workstations

SmarteX™

Test Automation **»»»** Made Easy

Product Information Sheet

SmarteX™ is a cost-effective solution for performing functional and regression testing to workgroups and test labs.

SmarteX™ delivers all of the power of SmarteScript™ with the exception of script creation and maintenance.

Install a full version of SmarteScript on one workstation to generate scripts; use SmarteX to execute the scripts on multiple workstations.

SmarteX™ Technology Innovations

Executes previously created scripts on any workstation.

Grid Visualization Engine™

Powers the execution of scripts using grid data created by SmarteScript™

Automatic Transaction Measurements

Automatically measures each transaction response time during test execution

Automated Window/Object Image Capture

Automatically reports windows that the test interacts with to ensure test path correctness

Scalable Regression Manager

Expedite regression testing by creating a list of tests to be executed as a single set. Various sets in different sequences can be loaded and executed on each workstation. This adds testing flexibility across multiple workstations and test environments

Automated Report Writer

Generate detailed reports for each step of every test case. Details include: type of objects, actions performed, and data types tested.

The SmarteSoft™ Product Suite

SmarteQM™ (Quality Manager)

SmarteSoft's complete QA Management Solution that delivers Requirements & Release Management, Test Case Management, and Issue & Task Management as a single solution

SmarteScript™

SmarteSoft's powerful and intuitive test automation application for functional and regression testing

SmarteLoad™

SmarteSoft's fully-integrated load & performance tool that streamlines functional, performance, and load testing

SmarteTime™

SmarteSoft's Network & Storage aware Test Execution Scheduling Tool

Minimum Requirements

Processor: Pentium 4 1.8GHz
Operating Systems: Windows 7, XP, Vista & Server 2003/2008
Memory: 1GB Minimum
Disk Space: Minimum of 500 MB (Full Install)
Display: 800x600 Min. Resolution
Browser: I.E. 6 or higher
